- Developed python applications focusing on core programming concepts, debugging, and real-world problem solving.
- collaborated with team members using git for version control and code management.
- enhanced scripting skills and automated backend tasks.

Projects & Research

AI-Powered Mock Interview System - Next.js, Java, PostgreSQL
Built an AI-driven mock interview platform that simulates technical and behavioral interviews, analyzes speech and tone, and provides real-time feedback to help candidates improve confidence and communication.

NotedAF (Academic Forums) - Tools and Technologies: ReactJs, Javascript, MongoDB.
Description: An academic collaboration platform built using the MERN stack — enabling teachers and students to create, view, and manage academic posts, classrooms, and interactions. This project features email OTP-based authentication and an AI-powered summarizer to enhance note clarity and learning.

Research Participation – "Detecting and Mitigating Black Hole Attacks in Manets using Advanced Deep Learing Techniques"
Event: National Student Research Symposium (SRS) - Kristu Jayanti (Deemed to be University), Bengaluru

Technical Skills

- **Programming Languages:** Java, Python
- **Machine Learning**: Supervised & Unsupervised Learning
- **Web Development:** HTML, CSS
- **Database Management:** MySQL
- **Tools & IDEs:** Eclipse ,Jupyter, Visual Studio Code, Word, PowerPoint

Certifications

- NPTEL Cloud Computing
- NPTEL Operating System Fundamentals
- Foundation of Cyber Security
- Block Chain for enterprises,101,201 and depth
- Automated Testing With Selenium
